A NOTE ON FORWARD-LOOKING STATEMENTS

This report contains forward looking statements. These statements primarily relate to assessments of future economic and market conditions. Such information has been included to assist readers with assessing recent developments in the Partnership's operating climate and possible future developments that may affect Partnership performance. All forward looking statements are based on management's current beliefs and assumptions which are subject to numerous risks and uncertainties. Statements with respect to future economic and market conditions are based on management's beliefs and assumptions which are subject to a range of factors, including market conditions generally and within the sectors in which the Fund's investments operate. While management considers such beliefs and assumptions will prove to be correct. As a result, these forward looking statements would typically include words such as "anticipates, believes, intended or estimated". Events or circumstances may cause actual results to differ materially from those expressed or implied by such forward looking statements as a result of numerous known and unknown risks and uncertainties, including, but not limited to, those associated with economic and market conditions, political stability and other risks identified in the Fund's prospectus. Most of these factors are beyond the control of the Fund and its Manager. Neither the Fund nor its Manager assumes any obligation to update any of the forward looking statements made in this report.

Management Discussion of Fund Performance

The Partnership

Marquest 2017-I Mining Super Flow-Through Limited Partnership is a limited partnership established under the laws of the Province of Ontario with two classes of units – National Class Limited Partnership Units and Québec Class Limited Partnership Units (the "Québec Class"). Each class of limited partnership units is a separate non-redeemable investment fund for securities laws purposes and has its own investment portfolio and investment objectives. The Québec Class investment portfolio is intended for investors in the province of Québec. The Québec Class was first offered on April 28, 2017 and issued 903,050 units for gross proceeds of \$9,030,500 during its offering period.

Results of Operations

The Québec Class issued 903,050 units for gross proceeds of \$9,030,500 during its initial public offering, which was completed on May 24, 2017. As at June 30, 2016, the proceeds raised during the initial public offering were fully invested in the Québec Class portfolio.

As at June 30, 2017 the Partnership's total NAV was \$6,389,202 a decrease of 29.25% since the closing of the initial offering. The change is due to net unrealized depreciation on investments of \$1,925,181 and offering expenses of \$668,667.

Recent Developments

The investment environment is well entrenched in the late stages of the economic cycle where interest rates rise, employment conditions are tight, commodity prices are firm and cyclical stocks outperform. The Canadian equity market tends to perform well in this market environment due to our resource based economy.

The Portfolio Manager remains of the view that the mining sector is in the early stages of a recovery. The recent improvement in global growth will expand the demand for metals commodities which will tighten the already balanced supply/demand environment. Stronger commodity pricing together with cost improvements in the industry over the past few years should support stronger cash flow and earnings in the mining industry.

Related Party Transactions

MQ 2017-I SD Limited Partnership (the General Partner) is the general partner of the Partnership. The General Partner has the responsibility for the management of the ongoing business, investment and administrative affairs of the Partnership, but has delegated the direction of the day-to-day business, operations and affairs of the Partnership to the Portfolio Manager. The Partnership is responsible for paying management fees to the General Partner equal to 2% of the NAV of the Partnership's assets.

During the period, \$27,339 in management fees (including HST) was charged by the General Partner.

Notes:

⁽¹⁾ The information is provided as at December 31st of the year shown.

⁽²⁾ Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. Excluding issuance costs, the management expense ratio for the period ended June 30, 2017 was 3.77%.

⁽³⁾ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period.

⁽⁴⁾ The Québec Class portfolio turnover rate indicates how actively the Québec Class portfolio adviser manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Québec Class buying and selling all of the securities in its portfolio once in the course of the year. The higher the Québec Class portfolio turnover rate in a year, the greater the trading costs payable by the Québec Class in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Québec Class.

(5) Waivers and absorption of certain expenses associated with the Québec Class are at the Manager's discretion and may be terminated at any time.

* The financial information is for the period April 28, 2017 - June 30, 2017.
