A NOTE ON FORWARD-LOOKING STATEMENTS

This report contains forward looking statements. These statements primarily relate to assessments of future economic and market conditions. Such information has been included to assist readers with assessing recent developments in the Fund's operating climate and possible future developments that may affect Fund performance. All forward looking statements are based on management's current beliefs and assumptions which are subject to numerous risks and uncertainties. Statements with respect to future economic and market conditions are based on management's beliefs and assumptions with respect to a range of factors, including market conditions generally and within the sectors in which the Fund's investments operate. While management considers such beliefs and assumptions to be reasonable based on information currently available to it, no assurance can be given that such beliefs and assumptions will prove to be correct. As a result, these forward looking statements would typically include words such as "anticipates, believes, intended or estimated". Events or circumstances may cause actual results to differ materially from those expressed or implied by such forward looking statements as a result of numerous known and unknown risks and uncertainties, including, but not limited to, those associated with economic and market conditions, political stability and other risks identified in the Fund's prospectus. Most of these factors are beyond the control of the Fund and its Manager. Neither the Fund nor its Manager assumes any obligation to update any of the forward looking statements made in this report.

Management Discussion of Fund Performance

Results of Operations

As at June 30, 2017, the Fund's total NAV was \$9,260,020, an increase of 13.22% since the prior year end (December 2016: \$8,179,001). The change is primarily due to net subscriptions of \$1,297,401.

Over the past six months, the Fund's Class A units lost 0.85%. See the Financial Highlights section for the management expense ratios and the Past Performance section for the returns of the other classes, which may vary because of differences in management fees and expenses.

The Canadian financials sub-index saw a modest appreciation during the first half of the year on the back of a continued rally in global markets. The S&P/TSX Capped Financials Index returned 2.55% during the first half of 2017. Canadian banks EPS growth remained quite strong, averaging 15% year over year growth during this period. The implied volatility levels on Canadian Financials were quite muted and below their historical average during the first half of the year, thus impacting the premiums received as part of the Fund's option writing strategy.

The Fund maintained its strategy of writing covered call options on approximately 40% of the positions in the portfolio, generating an average annualized option yield of 2.20%, in addition to the dividends collected by the portfolio.

Recent Developments

Canadian Financials, specifically Banks, continued to post stronger than expected growth due to increasing yields and overall stronger economic data. We anticipate the Bank of Canada to begin a tightening process sometime during the second half of 2017 which should be favourable for the Financials Index. Canadian banks should continue to trade within a narrow range during the remainder of the year on the back of macro uncertainty and the potential pullback in Canadian real estate prices. Furthermore, Banks are expected to return to a more normalized EPS growth of 8-10% from the current 16%. These conditions should bode quite favourably for the fund since covered call strategies tend to perform better in range bound markets. The indicative yield of the fund continues to be quite strong, with an average of over 5.50% in the first half of 2017.

INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE | For the Period Ended June 30, 2017

Related Party Transactions

Marquest Asset Management Inc. is the Manager (“the Manager”) of the Fund.

The Manager of the Fund is responsible for managing all of the Fund’s activities, including investment advisory and portfolio management services under a Management Agreement. The Management Agreement is subject to automatic renewal for additional one year terms. The Management Agreement may be terminated during its term if the Manager defaults in its performance of any of its duties or obligations thereunder and the holders pass a resolution at a meeting of holders terminating the Management Agreement as a result of such default. Further, the holders of a Fund may, by resolution passed at a meeting of holders at least 180 days before the end of the initial term or each anniversary thereof, elect not to renew the Management Agreement, whereupon the Management Agreement will not be renewed beyond its existing term. The Manager must give the holders and the Trustee at least 180 days’ notice of its intention not to renew a Management Agreement. Management fees are paid by each class at the rates set out under “Management Fees” below.

During the period, \$76,536 in management fees (including HST) was paid to the Manager. The Manager is also the trustee of the Fund and is responsible for certain aspects of the day-to-day administration. The Fund reimbursed the Manager for operating costs (including HST) incurred in administering the Fund of approximately \$9,664.

As disclosed in the Fund’s prospectus, the Manager may voluntarily waive, absorb or pay a portion of the Fund’s fees and expenses, at its discretion. During the period the Manager absorbed \$59,311 in expenses of the Fund.

Notes:

⁽¹⁾ The information is provided as at December 31st of the year shown.

⁽²⁾ Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period.

⁽³⁾ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period.

⁽⁴⁾ The Fund's portfolio turnover rate indicates how actively the Fund's portfolio adviser manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.

⁽⁵⁾ Waivers and absorption of certain expenses associated with the Fund are at the Manager's discretion and may be terminated at any time.

*The financial information is for the six-month period ending June 30, 2017.

**Class A units were first issued on September 9, 2014.

***Class F units were first issued on August 15, 2014.

Management Fees

The Management fees for each applicable class are calculated daily and are based on the Fund's ending total NAV per class; cumulative daily totals are then paid on a weekly basis. The Manager uses these management fees to pay sales and trailing commissions to registered dealers on the distribution of the Fund units, as well as for the general investment management expenses.

	Maximum Annual Management Fee Rate (%)	As a percentage of Management fees	
		Sales & Trailer Commissions (%)	Investment Advisory and Portfolio Management Services (%)
Class A Units	1.65%	100.00%	0.00%
Class F Units	0.65%	0.00%	100.00%

Past Performance

The performance information shown assumes that all distributions made by the Fund in the years shown were reinvested in additional securities of the Fund. The performance information does not take into account sales, redemptions, distributions or other optional charges that would have reduced returns or performance. How the Fund has performed in the past does not necessarily indicate how it will perform in the future. Performance differences between classes of units are mainly attributable to management fees charged to each class.

Year-by-Year Returns

The following bar chart shows the Fund's annual Class A and Class F performance for each of the years shown, and illustrates how the Fund's performance has changed from year to year. In percentage terms, the bar chart shows how much an investment made on the first day of each financial year would have grown or decreased by the last day of each financial year.
