FEATURE HOLDING: QMX Gold Corp.

QMX has an extensive land position in the Val d'Or Mining Camp on the southwestern portion of the Abitibi Greenstone Belt encompassing a 200 square km land package. The properties have several past producing gold and base metal mines and a permitted mill and tailings operation. The company has been systematically evaluating historical data in order to prioritize near term drill targets.

The company's major focus has been on the East Zone where it completed a 40,000m of reconnaissance drilling in 2017 and 2018 on several gold bearing intrusions. This drilling program made new discoveries and confirmed the expansion potential of these targets which have a 9km strike length.

The 2019 exploration program is to drill 40,000m including 10,000m of infill drilling on Bonfond South/New Louve to establish an Initial Resource, 20,000m on the Bevcon Intrusive and 10,000m on the Bourlamaque Zone. In addition the company plans to commence custom milling operations at the Aurbel Mill which will provide additional funding for the company.
