

THIS FUND IS FOR:

This Fund is designed for those investors with medium to long term investment goals and who are seeking tax effective income through exposure to the Canadian equity sector (including across small, medium and large cap stocks) within their portfolio.

INVESTMENT OBJECTIVES

The Fund seeks to provide holders with a stable monthly stream of cash distributions, which shall be determined on an annual basis by the Manager, and the potential for long term capital appreciation by investing primarily in large capitalization higher yielding securities but also some exposure to small and mid-capitalization high yield securities. A majority of this Fund's portfolio will be comprised of investments in dividend paying and/or income paying entities and whom the Manager believes intend to pay dividends and/or income in the near future.

INVESTMENT STRATEGIES

The Fund uses a value approach to high yield investments as a primary method to securities selection. This means searching for organizations that are able to maintain and grow their distributions. In addition, the Fund will look for organizations offering superior long-term earnings and cash flow per share growth, organizations exhibiting a strong position in the market in which it operates, quality management and balance sheet strength.

Marquest Funds are offered by Marquest Asset Management Inc. and distributed through authorized dealers. This fund profile should be used only as a general source of information, and should not be considered a solicitation to buy or an offer to sell securities of the fund. Mutual fund choices should be evaluated relative to individual investment objectives. While information is accurate as at the date noted, holdings and asset mix will change. Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus before investing. The indicated rates of return are the historical annual compounded total returns including changes in unit value and reinvestment of all dividends and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any securityholder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated. The rate of return or mathematical table shown is used only to illustrate the effects of the compound growth rate and is not intended to reflect future values of the fund or returns on investment in the fund.
